

SOLVING PMO CHALLENGES

With Hammerhead

The Top Three PMO Demands

1. Insightful dashboards.

Information needs to be driven to end users across multiple project portfolio areas by dashboards that are robust; providing visibility and insights to support key business decisions.

2. Easy access to data.

With simplified, straightforward access to data, timely and accurate reporting becomes painless.

3. Innovative tools and methods.

PMO's are constantly looking for new solutions to enhance project execution, facilitate timely reporting and proactively monitor performance.

Projility's Hammerhead software, reporting framework, and PPM data warehouse work directly with Microsoft Project Server and Project Online to deliver access to two critical sets of data.

Traditional Data

- Resource Allocation
- Status & Bottleneck Updates
- Schedule Health
- Risk Lists
- Milestone Tracking

Critical PPM Execution & Decision Information

- Benefits
- Change Order
- Scope
- Action Items
- Management Decision Points

Together they can:

- Leverage existing enterprise tools, such as Office 365, Microsoft Project or Project Online, and Power BI
- Maximize system performance and optimize workflows
- Reduce their decision-making timelines
- Visualize PPM information and scenarios

Clients who utilize pre-built Hammerhead solutions have realized many benefits without the cost of expensive customization.

Enhanced Data Access

Reduced Time-to-Value

Better return on investment

Lowered implementation cost

Access to ALL of their PPM information on demand
